

Rubber Metal antivibration mounts

SCBR WASHER

The SCBR elastic mounts are elements that work on the basis of compression since thanks to their design and assembly they provide an anti-rebound effect, thus permitting safety assemblies.

Moreover it contains a metallic part, that avoids a premature wear by friction between the rubber and the housing of the mount.

SCBR WASHER

OPERATION AND ASSEMBLY

Washers should be used, if the rubber surface is not covered with the contact surface.

ADVANTAGES

- Easy to assemble.
- Simple and economical product.
- Wide range of loads.

The inside stop effect makes them very recommendable for safety purposes.
